Preparatory Pedal-Exercises

At (a) the common, simple, and most advantageous manner of adding pedal-signs to a composition, directly under a note or chord, is indicated. It simply shows that the note or chord under which the sign stands should be sustained by the pedal. When the pedalling is indicated thus, it is assumed that the player knows how to use the pedal, that is, in a syncopated manner, as shown at (b), the foot pressing the pedal down on the dotted eighth-notes, and releasing it on the sixteenth-rests. (Compare Study No. 35.) Ed.
